U.S. Serial No.: 10/521,868

Final Office Action mailed January 29, 2009

Response submitted June 29, 2009

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listing of claims in the

application:

Listing of Claims:

1. (Previously presented) The method of claim 11, wherein said diatomaceous algae is

Chaetoceros gracilis.

2. (Previously presented) The method of claim 11, wherein said diatomaceous algae is

Skeleonema costatum.

3. (Previously presented) The method of claim 1, wherein the growth-limiting factor is

silicate deprivation.

4. (Previously presented) The method of claim 1, wherein the growth-limiting factor is a

nutrient deprivation.

5. (Previously presented) The method of claim 1, wherein more than one growth-limiting

factor is applied.

6. (Previously presented) The method of claim 1, wherein the growth-limiting factor is

applied once the culture has reached a concentration of at least 10⁷ cells/mL.

7-10. (Cancelled)

12611410.1

11. (Currently amended) A method for specifically producing polyunsaturated fatty acids from

diatomaceous algae, comprising the step of applying at least one growth-limiting factor to a

culture of diatomaceous algae at the end of the exponential growth phase after 6 to 7 days of

culture, causing growth arrest of said culture and production and stocking by said algae in culture

of polyunsaturated fatty acids.

12. (Currently amended) A method for producing specifically polyunsaturated fatty acids from

diatomaceous algae, comprising the steps of:

Final Office Action mailed January 29, 2009

Response submitted June 29, 2009

a. applying at least one growth-limiting factor to a culture of diatomaceous algae at the end of the exponential growth phase after 6 to 7 days of culture, causing growth arrest of said culture and production and stocking by said algae in culture of polyunsaturated fatty acids; and

b. recovering the polyunsaturated fatty acids from said algae.
